

# 4,6,10 Shooter™

SAEED MULTI-BAND LIGATOR

## **Band with confidence.**

Band retention is a potential clinical concern in relation to the risk for rebleeding. That's why the Saeed Multi-Band Ligator uses bands that demonstrate lower slippage rates when compared to other bands on the market.<sup>1</sup>

# Band Comparison

"The larger resting inner diameter and a significantly lower retraction force in neoprene bands, compared to rubber bands predisposed these bands to early slippage."<sup>2</sup>

# Optimized View

The Opti-Vu® Barrel facilitates a full view of each procedural move, allowing you to optimize deployment positioning.
